

Block Horizon

Network Assessment and Strategic Roadmap

Don't settle for mediocrity, be extraordinary

Investing in a robust and reliable infrastructure is the foundation for digital transformation and higher potential for health and care. But delivering such infrastructure is difficult and we're seeing significant challenges within the NHS organisations that we speak to.

Tip the scales in your favour

Your journey to a smarter network foundation can help tame complexity, empower staff and promote safe and effective care. It's time to empower your healthcare ecosystem with a network that not only meets but exceeds your expectations.

Move from strategy to reality

Our network assessment service helps networking teams translate a trust's digital vision into a practical, customised roadmap, providing a guide to get from your current network configuration to a Future Ready digital infrastructure.

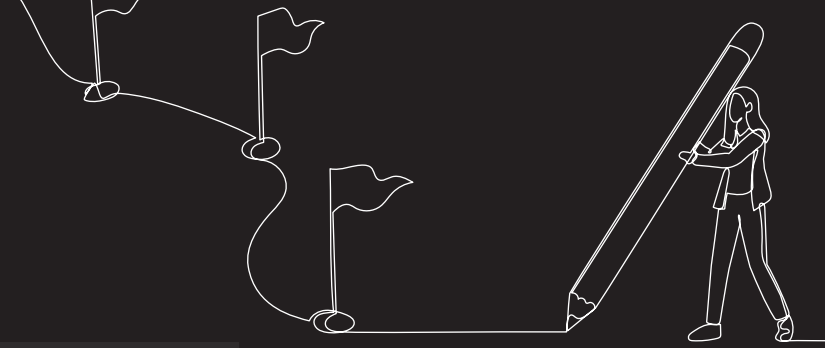

“

Barts is already seeing a host of positive changes from working with Block on our Trust-wide digital transformation. You can feel it on the ground, in patient feedback and staff morale.”

Fay Stevenson, Deputy Director of Informatics at Barts Health

BLOCK

A Future Ready Network Assessment 6 weeks or less

1 **Kick Off** **Strategic Alignment Meeting: Empowering Your Vision**

Initiate the engagement with a session to align our efforts with your Digital Strategy. We'll set clear goals for the assessment, ensuring that every step is clearly understood, and the right stakeholders are engaged.

2 **Data Capture** **Empowering Insightful Install Base Information**

Completion of a Cisco Letter of Authority (LOA) simplifies the collection of essential install base information. This not only ensures accuracy but also facilitates informative sessions for your teams.

3 **Technical Workshop** **Current State Capture: Empowering Technical Teams**

Work hand in hand with technical teams to take a deep dive into your current state, issues, and aspirations. Our approach is collaborative and centred around knowledge sharing, ensuring that your teams are not only informed but actively involved in the assessment process.

Output: Technical Roadmap

4 **Operations Workshop** **Enhancing Operational Insight: Empowering Seamless Operations**

Develop a broad understanding of how technology is operated in your specific environment. Through collaborative sessions, we bridge the gap between technology and service management which is paramount to ensuring success.

Output: Operating Model

5 **Business Case Workshop** **Financial Empowerment: Optimising Contracts and Spend**

Capture critical information on current contracts, planned spend, End of Life (EoL) plans, and the Business Case process. This session ensures that your teams are armed with key information to support the business case development, and ensure you get value for money.

Output: Business Case Outline

6 **Output Presentation** **Insightful Findings and Next Steps: Empowering Decision Making**

We present back our findings, delivering a comprehensive summary report. This session is not just about informing; it's a platform for feedback and discussion. We also explore next steps, enabling your teams to make informed decision with confidence.

**Output: Presentation and
Procurement Guide**
